The Brain and Motivation

Experiences Create Different Pathways

Hover over the labels on the brain regions or the highlighted text below to learn more about the role each plays in reward and motivation.

1. Experiences trigger neurons (brain cells) in certain regions of the brain to send chemicals to other neurons in different regions.
2. Repeated experiences create different pathways in the brain that link those experiences to thoughts, memories, and behaviors.
3. These linked pathways create powerful associations between what we do and the memories of how that made us feel physically and emotionally, and that drives our behavior.
4. We are motivated to repeat those experiences that made us feel good, and to avoid those that

IDEAS Impact Framework Training

Reimagining Program Development and Evaluation

What will this training do for me?

Since 2016, the IDEAS Impact Framework Training has helped people in a critical skills and knowledge. The training is ideal for anyone involved in the implementation, or evaluation of programs for children and families who to how to go beyond the best of what the field has achieved so far. Past participants have worked in a wide range of settings, including community-based organizations, non-profit organizations, philanthropic organizations, and policy/systems settings. Among other things, they have learned how to:

- Improve the impact of their interventions,
- understand the underlying mechanisms of an intervention by co-creating an evaluation plan with multiple stakeholders,
- identify programs with the greatest potential to impact kids and families facing adversity,
- redefine how they evaluate program effectiveness, and
- orient their businesses around impact and reach.

What does the agenda include?

- Opening Presentation: [Three Principles to Increase Outcomes for Children](#)
This presentation will cover three design principles that we can use to create and improve policies and programs for children and families.
- An Overview of the [IDEAS Impact Framework](#)
An introduction to the Framework designed to help innovators overcome barriers and go beyond the status quo to increase impact.
- IDEAS Impact Framework Case Study: [Theories of Change](#)
