

#AreYouKiddingMe?

“9 in 10 teachers spend at least three weeks reteaching lessons at the start of the school year.”

-National Summer Learning Association

The “summer slide” is a phenomenon that suggests students lose reading and math skills during summer vacation.

Take this opportunity to help kids retain their skills over the summer. Visit the library together and pick new books to read. Use math skills at the grocery store or while making dinner at home.

Any place can become a classroom with enough enthusiasm and knowledge. Little steps can help them greatly once the school year rolls around again.
